## Summary

---

- I'm a creative frontend developer, creating animated website using HTML, CSS, JavaScript, React, Redux, GSAP, LocomotiveJS and WordPress.

## Skills

---

- HTML | CSS | Tailwind | JavaScript | React | GSAP | Framer | Locomotive | ThreeJS | Git | GitHub | WordPress

## Projects

---

- **React Movie App** | [Live Link](#)

Developed a movie app using React, Vite, and the TMDB API. Tailwind CSS was utilized for styling to ensure a responsive and modern user interface.

- **BMW Recreated** (Hackathon Project) | [Live Link](#)

Recreated the BMW website for the second round of a national hackathon. Implemented creative animations to deliver an engaging and interactive user experience.

- **Magma** | [Live Link](#)

Designed a visually captivating website featuring a dynamic canvas image scroll effect to enhance the overall browsing experience.

- **Lazrev** | [Live Link](#)

Cloned an Awwwards-winning agency website, replicating its highly praised layout and implementing minimalistic animations to create a seamless user interface.

- **Obeys Agency** | [Live Link](#)

Developed a clone of the Obeys Agency website, featuring advanced hover effects powered by SheryJs.

- **Rejoice** | [Live Link](#)

Created a minimalistic yet impactful website with visually pleasing animations, focusing on delivering a clean and engaging user experience.

## Education

---

Bachelors of Engineering  
L.D. College of Engineering, India

(Graduation Year: 2026)
